

Canoe safari - half day trip

Cetina river - the green beauty

This tour will give you a taste of adventure away from mainstream tourism, from cities and crowded beaches. The slow flowing Cetina river is ideal even for people without prior experience in canoeing to go exploring. You don't need to paddle much. The river will carry us slowly downstream from our launch point at Gala village 40 km north of Split to the old Roman stronghold of Trilj, 30 km north of Split. This trip is a lovely effortless way for the whole family to experience the wild life and nature of this area. Our three-seater Canadian canoes are very stable and comfortable. Our guides are experts in canoeing and sea kayaking. They know the river well and will explain the history, wildlife and nature of this beautiful region along the way.
